NOTES TO FINANCIAL STATEMENTS

NOTE 1 Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices, Impact of NAIC/State Differences

The financial statements of First Acceptance Insurance Company of Georgia, Inc., (the "Company") are presented on the basis of accounting practices prescribed or permitted by the Georgia Department of Insurance.

The Georgia Department of Insurance requires insurance companies domiciled in the state of Georgia to prepare their statutory financial statements in accordance with the National Association of Insurance Commissioners' (NAIC) Accounting Practices and Procedures Manual subject to any deviations prescribed or permitted by the Georgia Department of Insurance.

The Company's net income and surplus did not include any accounting practices prescribed or permitted by the Georgia Department of Insurance during the current or previous reporting periods.

B. Use of Estimates

The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported and disclosed amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the Financial Statements and the reported amounts of revenues and expenses during the reporting period. Actual results could materially differ from those estimates.

C. Accounting Policies

Premiums are earned over the terms of the related insurance policies and reinsurance contracts. Unearned premium reserves are established to cover the unexpired portion of premiums written, such reserves are computed by pro rata methods.

Expenses incurred in connection with acquiring new insurance business, including such acquisition costs as sales commissions, are charged to operations as incurred.

Certain assets are non-admitted and charged directly against surplus. Such assets principally include premiums over 90 days past due, non-admissible taxes, and prepaid expenses.

In addition, the Company uses the following policies:

(1) Short-term investments are stated at amortized cost.

(2) Bonds are stated at amortized cost using the interest method.

(3) Common stock is stated at fair value.

(4) Preferred stock is stated at fair value.

(5) The Company does not hold investments in mortgage loans.

(6) Asset-backed securities are stated at amortized cost. The retrospective adjustment method is used to value all securities except for interest only securities or securities where the yield had become negative, that are valued using the prospective method. Securities for which the Company does not expect to recover the entire amortized cost basis are stated at the present value of cash flows expected to be collected, discounted at the security's effective interest rate.

(7) The Company does not hold investments in subsidiaries, controlled and affiliated entities.

(8) The Company does not hold investments in joint ventures, partnerships, or LLCs.

(9) The Company does not hold investments in derivatives.

(10) The Company does anticipate investment income when evaluating the need for premium deficiency reserves.

(11) Unpaid losses and loss adjustment expenses include an amount determined from individual case estimates and loss reports and an amount based on historical experience for losses incurred but not reported. Such liabilities are necessarily based on assumptions and estimates and while management believes the amount is adequate, the ultimate liability may be in excess of or less than the amount provided. The methods for making such estimates and for establishing the resulting liabilities are continually reviewed and any adjustments are reflected in the period determined.

(12) The Company has not modified its predefined capitalization thresholds from those of the prior year.

(13) The Company has no pharmaceutical rebate receivables.

For other mortgage-backed, loan-backed, and structured securities, company utilizes prepayment assumptions from Moody's Analytics. Moody's applies a flat economic credit model and utilizes a vector of multiple monthly speeds as opposed to a single speed for more robust projections. In instances where Moody's projections are not available, company's investment software uses data from Reuters, which utilizes the median prepayment speed from contributors' models.

NOTE 20 Fair Value Measurements

A. Inputs Used for Asset and Liabilities Measured and Reported at Fair Value

(1) Fair Value Measurements at Reporting Date

SSAP 100R defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. SSAP 100R specifies a fair value hierarchy based on whether the inputs to valuation techniques used to measure fair value are observable or unobservable. The fair value hierarchy prioritizes the inputs to valuation techniques used to measure fair value into three broad levels based on the reliability of the inputs. The fair value hierarchy gives the highest priority to quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The hierarchy, based on the reliability of inputs, is as follows:

Level 1 - Quoted Prices in Active Markets for Identical Assets and Liabilities: This category, for items measured at fair value on a recurring basis, includes exchange-traded preferred and common stocks. It also includes derivative liabilities for written call options on common stock which are also exchange traded. The estimated fair value of the equity securities and derivatives within this category are based on quoted prices in active markets and are thus classified as Level 1.

Level 2 - Significant Other Observable Inputs: This category for items measured at fair value on a recurring basis includes bonds, preferred stocks and common stocks which are not exchange-traded. The estimated fair values of some of these items were determined from quotations received from third-party nationally recognized pricing services ("Pricing Service") using observable inputs. Others were based on quotes from markets which were not considered actively traded.

Level 3 - Significant Unobservable Inputs.

The availability of observable inputs can vary and is affected by a wide variety of factors, including, for example, the type of financial instrument, whether the financial instrument is new and not yet established in the marketplace, and other characteristics particular to the transaction. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires significantly more judgment. Accordingly, the degree of judgment exercised by management in determining fair value is greatest for instruments categorized in Level 3 hierarchy. The Company uses prices and inputs that are current at the measurement date. In periods of market dislocation, the observability of prices and inputs may be reduced for many instruments. This condition could cause an instrument to be reclassified between levels.

(3) Policy on Transfers Into and Out of Level 3

At the end of each reporting period, the Company evaluates whether or not any event has occurred, or circumstances have changed that would cause an instrument to be transferred into or out of Level 3. During the current year, no transfers into or out of Level 3 were required.

(4) Inputs and Techniques Used for Level 2 and Level 3 Fair Values

U.S. government and U.S. agency bonds are based on quoted market prices in active markets and are included in the Level 1 fair value hierarchy. All other bonds are carried at fair value categorized as Level 2 and were valued using a market approach. These valuations were determined to be Level 2 valuations as quoted markets prices for similar instruments in an active market were utilized. Preferred stock and common stock are based on quoted market prices in active markets and are included in the Level 1 fair value hierarchy.

NOTE 25 Change in Incurred Losses and Loss Adjustment Expenses

A. Reasons for changes in incurred losses related to past events
Reserves for incurred losses and loss adjustment expenses attributable to insured events of prior years have decreased by approximately $7.1 million from December 31, 2024 to December 31, 2025 as a result of the re-estimation of unpaid losses and loss adjustment expenses. This change is generally the result of the ongoing analysis of recent loss development trends. Original estimates are increased or decreased as additional information becomes known regarding actual losses.

NOTE 26 Intercompany Pooling Arrangements

The Company had previously participated in a quota share reinsurance pooling arrangement with the following affiliated companies (the "Pooling Arrangement").

Pool Participant	NAIC Code	Pooling %
First Acceptance Insurance Company, Inc. (Lead Reinsurer)	10336	59%
First Acceptance Insurance Company of Georgia, Inc.	11508	28%
First Acceptance Insurance Company of Tennessee, Inc.	12825	13%

Under the terms of the former Pooling Arrangement, the Pool Participants ceded to the Lead Reinsurer all of their insurance business and assumed from the Lead Reinsurer an amount equal to their respective pooling percentages as outlined in the Pooling Arrangement. All premiums, losses, loss adjustment expenses, underwriting expenses and the related finance and service charge income were allocated among the Pool Participants on the basis of each company's respective pooling percentages as outlined in the Pooling Arrangement. The Pooling Arrangement provided indemnification against loss or liability relating to insurance risk and had been accounted for as reinsurance.

In March 2025, the Companies received regulatory approval and commuted the Reinsurance and Pooling Agreement effective January 1, 2025. Upon commutation of this Agreement, First Acceptance Insurance Company of Georgia, Inc. and First Acceptance Insurance Company of Tennessee, Inc. reimbursed First Acceptance Insurance Company, Inc. for their respective percentage shares of policy liabilities ceded and transferred and assumed and reinsured as of December 31, 2024.

Due to the commutation of the intercompany pooling agreement, historical data for previous accident years have been restated for Schedule P Parts 1 through 6 to remove the impact of pooling. Additionally, the commutation settlement impacting paid losses, paid LAE, and written premium in the current reporting year have also been removed from Schedule P. As a result of this treatment to present meaningful development patterns in Schedule P, the totals within Schedule P will not directly tie to the Company's income statement by the values noted in the table above.

To the extent that transfers of any non-cash assets were required to effect the commutation, transfers were made at the statutory book values as of the date such transfers were made. The Companies will separate audited statutory financial statements for the year ended December 31,2025 and forward.
